ALBA

Installation

1/ Use the two dowels and screws provided with the electrical system, and fix the bracket to the wall on an electrical outlet.

2/ Screw the electrical sytem on the bracket.

3/ Position the wall light so that the electrical system is in the center of the ceramic sconce.

4/ Using the remaining dowels and screws, fix the ceramic sconce to the wall, then screw in the bulb.

Safety warning: We recommend that you contact an electrician for the installation.
